To Whom This May Concern,

I am writing to recommend Artisan Partners Construction Services (APCS) as my choice for Construction Management Services for Owner's Representative Services. While other management firms are qualified, APCS demonstrates a solid level of management knowledge, skills and experience that serve Gallaudet University well.

Currently APCS is participating in a large scale slope stabilization project for Gallaudet University at the Model Secondary School for the Deaf (MSSD) and is actively planning, coordinating and communicating key procedure management aspects of the project.

This unique project involves Structural Engineers, Geotechnical Engineers, Civil Engineers, Land Planners, Surveyors, General/Sub Contractors and the Gallaudet Director of Construction Services. Together, this team of professionals has planned for and is currently performing soil stabilization work on a sliding hillside that underpins the MSSD Complex that consists of 11 academic, residential and utility buildings encompassing approximately 477,790 square feet of space, tennis and handball courts and a full scale football field all on approximately 25 acres of land.

APCS is exceeding my expectations regarding their professionalism and strong work ethic combined with their exceptionally talented staff. APCS contributions have built a strong working relationship with Gallaudet University and the project team.

Since you will need a well experienced Construction Management Firm soon, I recommend Artisan Partners Construction Services for your future Construction Management Service needs.

Best Regards,

Michael Fields,  
Director of Construction Services  
Gallaudet University
